RE: UIC MINOR PERMIT MODIFICATION
Conversion of Additional Well to

Antelope Creek Waterflood

EPA Area Permit UT2736-00000

Duchesne County, Utah

Dear Ms. Turner:

Your letter of December 15, 1997, requesting that the following production well be converted to a Class II enhanced oil recovery well and added to the Antelope Creek Waterflood, as authorized under EPA Area Permit #UT2736-00000, is hereby granted.

<u>NAME LOCATION EPA WELL PERMIT NO.</u>

#UT2736-04416

Duchesne County, UT

This additional well is within the boundary of the existing area permit for the Antelope Creek Waterflood (UT2736-00000), and this addition is made by minor permit modification according to the terms and conditions of that permit. Unless specifically mentioned in this Minor Permit Modification, all terms and conditions of the original permit will apply to the construction, operation, monitoring, and plugging and abandonment of this additional injection well. The proposed well location, well schematic, conversion procedures, plugging and abandonment plan and schematic, submitted by your office, have been reviewed and approved as follows:

(1) The conversion of this production well has been reviewed, and found satisfactory, therefore, no corrective action is required.

Antelope Creek Waterflood

EPA Area Permit UT2736-00000

Duchesne County, Utah

Dear Ms. Turner:

Your letter of December 15, 1997, requesting that the following production well be converted to a Class II enhanced oil recovery well and added to the Antelope Creek Waterflood, as authorized under EPA Area Permit #UT2736-00000, is hereby granted.

NAME

LOCATION

EPA WELL PERMIT NO.

Ute Tribal #29-06

SE/NW Section 29 T 5 S - R 3 W

#UT2736-04416

Duchesne County, UT

This additional well is within the boundary of the existing area permit for the Antelope Creek Waterflood (UT2736-00000), and this addition is made by minor permit modification according to the terms and conditions of that permit. Unless specifically mentioned in this Minor Permit Modification, all terms and conditions of the original permit will apply to the construction, operation, monitoring, and plugging and abandonment of this additional injection well. The proposed well location, well schematic, conversion procedures, plugging and abandonment plan and schematic, submitted by your office, have been reviewed and approved as follows:

(1) The conversion of this production well has been reviewed, and found satisfactory, therefore, no corrective action is required.

Maximum injection pressure (Pmax) - the permittee submitted a list of two (2) individual zones, within the Ute Tribal #29-06, which were individually fraced and established an average fracture gradient (Fg) of 0.90 psi/ft. which was derived from instantaneous shut-in pressures (ISIP) from each zone. This Fq is acceptable to the Environmental Protection Agency (EPA), and a theoretical maximum allowable surface injection pressure (Pmax), for this well, may be calculated as shown below:

Pmax = [Fq - 0.433 (Sq)] d

Pmax = Maximum surface injection pressure Where: at wellhead

d = 4314' shallowest perforations

Sg = Specific gravity of injected water

Pmax = [0.90 - .433 (1.00)] 4314

Pmax = 2015 psig

Until such time as the permittee demonstrates that a fracture gradient other than 0.90 psi/ft applies to the disposal zones of this newly converted well, the maximum allowable wellhead injection pressure (Pmax) for this well will be 2015 psig.

(3) The plugging and abandonment plan and schematic, submitted by your office, has been reviewed, approved.

Prior to commencing injection into this well, permittee must fulfill permit condition Part II, C. 2. and have received separate written authorization to inject by the Environmental Protection In summary, these requirements for your newly permitted injection well are:

- All conversion is complete and the permittee (1) submitted a completed Well Rework Record (EPA Form 7520-12).
- (2) The pore pressure has been determined.
- The well has successfully completed and passed a (3) mechanical integrity test (MIT); MIT guidance and EPA form enclosed.

All other provisions and conditions of the permit remain as originally issued.

If you have any questions, please contact Mr. Chuck Williams at (303) 312-6625.

Also, please direct the above requirements to Mr. Williams at the above letterhead address, citing MAIL CODE 8P2-W-GW. Thank you for your continued cooperation.

Sincerely,

Kerrigan G. Clough
